

FOUR YEAR INDIVIDUAL COURSE SELECTION PLANNING GUIDE

Use this worksheet to plan your program for the four years of high school. Use this space provided to list the courses and credits you will want to take and need to complete for graduation. In completing your worksheet, you will want to consider your future career and educational plans as well as the graduation requirements of Wissahickon School District. Of equal importance will be the difficulty level of the course as compared to your own academic ability and degree of motivation. This plan is tentative and subject to change from year to year. Be sure to discuss your plans with your parents and if you have questions or need assistance, please see your guidance counselor.
